

Oil-Water-Separator *drukomat plus*

more efficiency
with preko-streamingfilter
higher capacity and longer filter use

FUNCTION

- 1 *Condensate feed is possible both under pressure and pressureless*
The condensate is feed from the compressor, or the tank, or the dryer if possible with pressure.
(4 connections 1/2inch)
- 2 *Chamber for expansion and de-airation with charcoal filter to exhaust air*
This expansion and de-airation chamber assures a calm surface in the separator, even if the condensate is fed under pressure. The activated charcoal filter eliminates the oil from the exhaust air.
- 3 *Collecting chamber*
- 4 **NEW** - *preko-streamingfilter*
- 5 *Settling and Flotation Chamber*
- 6 *End stage filter*
- 7 *Water discharge*
The remaining oil content of the water discharged is less than 10mg/ltr. if the equipment is correctly dimensioned. This water can be discharged directly into the sewers.
- 8 *Test valve*
The test valve permits very simply to take dischargewater samples
- 9 *Oil-collect tank with overflow safe-guard*
- 10 *Test set ... check-glass and oil test paper*
See Check- and Maintenance Book
- 11 *Document department*
Operating instructions as well as the Check- and Maintenance Book are at the fingertips at all times.
- 12 *optical level control as standard*
SPDT available as option (retrofitable at any time)
- 13 *Heater (optional)*
